

CONGRATULATIONS

INARI TECHNOLOGY SDN. BHD. New Factory & Office (Plant 3) OFFICIAL OPENING 28TH SEPTEMBER 2009

Inari Technology Message

Inari Technology Sdn Bhd, a Member of the Insas Group of Companies, is a wholly Malaysian owned company established in June 2006 with the mission to service the local and overseas electronic manufacturing industry with full integration from front end to back end processes, focusing on radio frequency (RF) device packaging & testing.

Inari Technology is operated by a team of engineering professionals whose experiences are wide covering wafer processing, semiconductor assembly, and packaging and Final Test. Inari Technology offers full turnkey services converting semiconductor wafers to final packaged products. Inari Technology is currently focused on the assembly of multi chip hybrid packages. Inari Technology is also one of the largest companies in the region performing and providing DC and

RF testing for finished products.

Since inception in June 2006, Inari Technology has grown rapidly over the past 3 years. The total production space at Inari Technology is now 100,000 sq feet spread over three plants. The latest Plant 3 was acquired in July 2008 and commenced operations in Feb 2009. Thus far, the shareholders of Inari Technology have invested a total of RM65 million and in the process; Inari Technology has created 1300 new jobs in Malaysia, and generating indirect jobs for many more. In order to guarantee smooth operations and continuous success in business evolution, there is need for an appropriate building with sufficient space to allow the different activities to perform their regular and development functions. However, the new plant, Plant 3 is expandable as we develop the need for more

capacity and future business growth.

Inari Technology Technology's operations are ISO9000 QMS and ISO14000 EMS quality and environmental standards certified. With its fully established facilities and a strong global presence through Insas Berhad, Inari Technology has embark into the next stage of growth, prepared to serve more world class customers in electronic manufacturing services (EMS). With our knowledge and expertise in technical know-how, R&D investments and support, collaborative partnering strategies in Malaysia, Singapore & Germany; we envisage steering Inari Technology into international markets and ultimately place Inari Technology on a solid world class footing in the near future.

Message from

YAB TUAN LIM GUAN ENG

The Right Honourable Chief Minister of Penang

My heartiest congratulations to Inari Technology Sdn Bhd, a member of the Insas Berhad Group of Companies, on the expansion of your new investment of RM65 Million for Plant 3 facility in Penang. The new facility will be Inari Technology's 3rd plant in Penang dedicated to assemble multi chip hybrid packages and its now one of the largest companies in the region performing and providing DC and RF testing for finished products. In addition, Inari Technology offers full turnkey services converting semiconductor wafers to final packaged products.

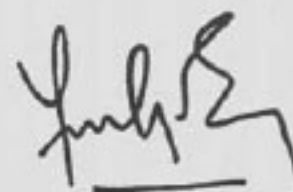

The Penang state government wants to established a stable people oriented government where we can fulfill the vision of transforming Penang into an International City that is a location of choice for investors, a destination of choice for tourists and a habitat of choice for those who desire sustainable living. A Penang people's government is one that is built upon

3E principles. Firstly, **ENABLING** the people with education skills and opportunities are necessary to succeed in this competitive market. The second is **EMPOWERING** the people with freedom, rights and responsibilities to enjoy equal opportunities and equal treatment, with full observance of the rule of law. Thirdly, **ENRICHING** the people to improve the quality of life and share the fruits of economic success.

Your expansion resonates to Penang State Government's vision of making Penang the location of choice of high tech manufacturers. The new factory is a true testament that Penang has the supporting industries as well as the human capital to offer and these factors will allow Inari Technology to increase its increase in production and engineering capacities leading to better technologies and technical know-how. With the presence of Inari Technology as wholly Malaysian owned company in Penang, I am certain that

Penang will continue to be the destination of choice for other local and international high-tech. Once again, congratulations to Inari Technology Sdn Bhd and thank you for your continued faith in Penang and confidence in its people.

Thank you,

(Lim Guan Eng)

Chief Minister of Penang

Message from

DATO' WONG GIAN KUI

Director of Inari Technology Sdn Bhd
Insas Berhad.

Since its founding in June 2006, Inari Technology's business and operations growth has taken place at a time when both global competition and the ongoing global economic crisis have been challenging for many Electronic Manufacturing Services (EMS) providers and factories in Malaysia. The competition from China and other Asian tiger economies are keen both from cost driven manufacturing and more sophisticated technologies requiring highly skilled labour and capital intensive investments. To continue our growth and maintain our competitiveness, Inari Technology requires support from the government for world class infrastructure, human resource training and R&D funding. In return, home grown companies like Inari Technology will be able to continue providing employment for Malaysians and help bring about prosperity and stability to our communities.

Inari Technology's success to date will not be possible without good support from

shareholders, Insas Berhad in particular for its financial commitment and support extended to Inari in the past 3 years, the management, employees, customers and suppliers both local & overseas. I would like to thank the senior management and staff of Inari for their hard work, grit and skills to make the set up & growth of Inari possible. I would like to encourage them to continue the good work and to focus on continuous training, discipline and maintain the highest quality output for our customers.

The next few years will be challenging years for Inari Technology as it looks to continue its growth, establish its footprint and benchmark against major players in the global EMS industry. Therefore, apart from the hard technologies, systems and engineering skills, we believe the long term success for Inari lies our humility and in strong collaboration between our company with our business and technology partners, customers, suppliers, Penang State and Federal

government agencies.

Today, we celebrate the opening of Inari's Plant 3, a world class and state of the art facility which houses many of our High Tech operations. We look forward to the continued success for Inari Technology.

Best regards,

Dato' Wong Gian Kui
Director
Inari Technology Sdn Bhd
Insas Berhad.
